

The natural choice is the Harmony™ Professional yoga mat from JadeYoga. Harmony brings together natural rubber from the Far East, one of earth’s most amazing natural resources and Western technology to form a mat that is perfect for your yoga practice.

Harmony Holds

As Harmony is made of open cell rubber, you can say goodbye to slipping on our practice mat, even if it gets wet from perspiration. Rubber has long been used where safety demands non-slip performance. Harmony takes advantage of the non-slip properties of rubber, resulting in the best slip-resistance on the market. Try it, we are sure you will agree.

Harmony performs

In addition to providing better slip-resistance Harmony has exceptional resilience, unmatched “compression set” resistance and incomparable cushioning. Jade mats are better for you and the environment than any other mat on the market.

Harmony is green

Harmony is constructed of natural rubber, containing no PVC, synthetic plastics or ozone depleting substances. JadeYoga rubber is sourced from plantations in Malaysia and Vietnam. Rubber is a renewable resource and is sustainably tapped from rubber trees. Through our partnership with Trees for the Future, JadeYoga plants a tree for every yoga mat you buy. It is perfect for the yogi concerned about the environment.

Made in the United States

In compliance with all US environmental, labour and consumer protection laws. Jade mats are available in 4 thicknesses, 4 lengths, 2 widths and in 14 colours. For washing and drying instructions see our website’s FAQ. Please, avoid exposure to direct sunlight.
